

Requisition Title: Principal Consultant – Essbase Development job

Date: May 25rd, 2011

Location: Chicago, IL, US

Job Title: Principal Consultant – Business Intelligence Practice

Requisition Number: BI126

Practice: Business Intelligence

Area of Interest: Application Services, Oracle / Hyperion, Information Technology, Finance, Business Intelligence, Reporting, Essbase, OLAP

State: Virtual (MI, IL, IN, CO, NY, CT)

City: Virtual (Detroit, Chicago, Indianapolis, Denver, NYC, Hartford)

Description:

Are you a business focused person with technical skills? Are you motivated by creating elegant solutions to complex client problems? That is what we do at CheckPoint Consulting LLC. We provide complete Enterprise Performance Management implementation services utilizing Oracle's EPM suite, and we are currently seeking a Principal Consultant for our Business Intelligence Practice to join our team.

As a CheckPoint resource, you will assist clients by helping them drive the right performance management capabilities. You will help them focus on the processes and technology insights that can drive business performance, while providing technical leadership and implementation best-practices to cost-effectively provide timely, relevant, and accurate information.

Responsibilities:

This hands-on position requires considerable experience with the Oracle Essbase product suite (Essbase, Web Analysis, Financial Reporting, SmartView), data integration tools (Essbase Integration Services, Essbase Studio), and demonstrated project leadership skills. Some of the key responsibilities for the position are as follows:

- Lead implementation delivery teams in the active execution of engagements in compliance with service delivery methodology and standards.
- Assist with requirements gathering, development of project scope, and estimating projects

- Serve as the Subject Matter Expert for Technical Design of the future state solution
- Serve as one of the hands-on leaders for implementation of the product suite
- Develop key business processes for utilizing Oracle Essbase to drive business value for your clients
- Mentor staff through coaching, collaborating, and project management
- Utilize technical and industry knowledge to identify complex client issues
- Build long-term business relationships with key client resources through engagement delivery and networking in professional organizations
- Participate in business development by assisting in identifying new opportunities and proposal development
- Contribute thought leadership to the development and evolution of our implementation methodologies and intellectual capital. Responsibilities would include publishing articles, whitepapers or performing research in support of BI initiatives
- Assist in managing and providing leadership to teams of staff level professionals and become actively involved in staff development and practice management

Qualifications:

- Five plus years of relevant work experience with BI solutions including three years of experience in an advisory firm or implementation firm providing high quality client services and technical solution
- -Willingness to travel up to 100%
- Three plus years experience in full lifecycle implementations of Oracle Essbase
- Three years of Implementation and/or Advisory Services experience as a Business and/or Technical Analyst on EPM, ERP and/or Business Intelligence projects
- BS/BA degree in IT, Computer Science or Accounting/Finance from an accredited college/university
- Experience in database, Data Warehouse, and OLAP design and implementation with related oracle technologies
- Experience in designing and implementing infrastructure to support development and production of applications using oracle data integrator, other ETL and related business intelligence technologies
- Experience in web technologies including weblogic web and application servers
- Experience in javascript and java technologies a significant plus
- Proven effective execution experience in high visibility, high criticality programs with multiple stakeholders both within and outside of the client organization

CheckPoint offers a unique and comprehensive compensation / benefits package, including a generous bonus package.
