

Requisition Title: Principal - Hyperion Planning job

Date: May 3rd, 2011

Location: Chicago, IL, US

Job Title: Principal – Planning, Budgeting and forecasting Practice

Requisition Number: PBF102

Practice: Planning, Budgeting and forecasting

Area of Interest: Application Services, Oracle / Hyperion, Information Technology, Finance, Planning Process

State: Illinois

City: Chicago

Description:

Are you a business focused person with technical skills? Does tackling complex client problems with elegant solutions motivate you on a daily basis? That is what we do at Checkpoint LLC consulting, we provide complete performance management implementation services, and we are currently seeking a Principal Consultant in our Planning Practice Senior Consultant to join our team.

As a CheckPoint resource, you will assist clients by helping them drive the right performance management capabilities. You will help them focus on the processes and technology insights and that can drive business performance, while providing technical leadership, know-how, and infrastructure to cost-effectively provide timely, relevant, and accurate information.

Responsibilities:

This hands-on position requires considerable experience with the Oracle Hyperion Planning product suite, Essbase, and strong functional and demonstrated project leadership skills. Some of the key responsibilities for the position are as follows:

- Lead implementation delivery teams in the active execution of engagements in compliance with service deliver methodology and standards.
- Assist with requirements gathering, developing project scope, and estimating projects
- Serve as the SME for Technical Design of the future state solution
- Serve as one of the hands on leaders for implementation of Hyperion Planning and Essbase

- Develop key business processes for utilizing Hyperion Planning to drive business value for your clients
- Mentor staff through coaching, collaborating, and project management
- Utilize technical and industry knowledge to identify complex client issues
- Build long-term business relationships with key client resources through engagement delivery and networking in professional organizations
- Participate in business development by assisting in identifying new opportunities and assisting with proposal development
- Contribute thought leadership to the development and evolution of our implementation methodologies and intellectual capital including publishing articles, whitepapers or performing research in support of EPM initiatives
- Assist in managing and providing leadership to teams of staff level professionals and becomes actively involved in staff development and practice management

Qualifications:

- Five plus years of relevant work experience with finance planning and analysis including three years of experience in an advisory firm or implementation firm providing high quality client services and technical solutions; ability to travel
- Three plus years experience in full lifecycle implementations of Hyperion Planning and Essbase
- BS/BA degree in Accounting or Finance from an accredited college/university
- -Three years of Implementation and/or Advisory Services experience as a Business and/or Technical Analyst on EPM, ERP and/or Business Intelligence projects
- Three years of Hyperion experience including at least 2 years with Oracle | Hyperion System 9 EPM tools such as Hyperion Financial Management, Financial Data quality Management, Dimensional Relationship Management, and Business Intelligence including Essbase and OBIEE.

CheckPoint offers a unique and comprehensive compensation / benefits package, including a generous bonus package.
